## Personal Profile

Since the age of 14 I have been passionate about programming, at 17 I had taken on my first project where the opportunity of using my android development skills at a professional capacity with SchoolsUnited B.V presented itself. My ambitions are to learn and prosper. This does not end with programming. Having intensively focused my personal development on subjects such as entrepreneurship, I was able to lead SchoolsUnited's vision of expanding to a European scale, by overseeing the sales for the Italian market, where I coordinated a team of 4.

## Professional Skills

HTML

CSS

JS

VUE 3

Vuex & Router

FIREBASE

Cloud DB

GIT

Version control

## Languages

**English**

Anglia C2 - Masters level

**Dutch**

Fluent

**Italian**

Native

## Hobbies

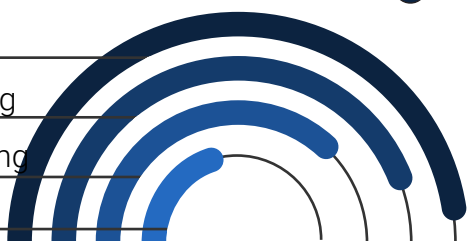

Reading

Motor racing

Programming

Fitness

## Experience

### SchoolsUnited B.V - Apr-2020 - present

SchoolsUnited has given a great deal of experience in the field of software development. It is where I have learned to cooperate with professionals and learn from their decades of experience. I also learned

Responsibilities :

- Maintained the code base of the pre-existing application built in HTML / CSS, Vanilla JavaScript.
- Cooperated in the reconstruction of the mobile application from the Vanilla JS version built in 2012 to a modern standard using Vue3 framework combined with Apache Cordova (a.k.a PhoneGap) for hybrid capabilities.
- Responsible for implementing the front-end UI/UX components & handling the connection to our REST api.
- Wrote the code for multilingual capabilities e.g Dutch, English & Italian.
- Handled customer tickets & being proactive in spotting bugs & fixing them as they arose

## Projects

### Invoice App - [Click to view live project](#)

[Vue JS](#) [Firebase DB](#) [Responsive](#)

This project is a full stack application using Vue.JS for front-end design & functionality combined with Firebase Realtime database for backend data storage. It allows users to add/edit invoices & mark them off as a draft, pending or paid status.

### Feedback Forum - [Click to view live project](#)

[Vue JS](#) [Firebase DB](#) [Responsive](#)

This project is also a full stack application which resembles an online forum where customers request new features and or bugs. Making full use of Vue Router for multi-page functionality.

## Education

**ICT Campus** - Aug-2017 / 2020

MBO 4

**Coursework:**

HTML5/CSS3 - Javascript- JQuery - PHP - Data Modelling - MySQL

**Highschool** - 2013-2017

MAVO
